

# FARM HEALTH FASTMAPS

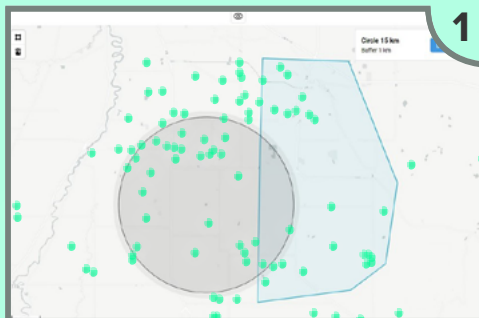

## Disease Mapping in Minutes

Farm Health FastMaps is an animal disease mapping tool for organizations and governments to identify control zones in minutes and quickly send alert messages to stop disease spread.

### Easy and secure disease mapping in minutes

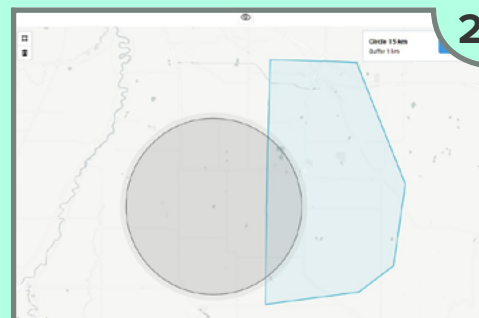

Farm Health FastMaps helps disease mappers within producer organizations or governments to easily establish zones and quickly communicate with impacted farms where heightened biosecurity is needed. The system offers an all-in-one mapping and communications tool to help at-risk farms and the entire sector take early action before a disease gets out of hand.

### How Farm Health FastMaps Works

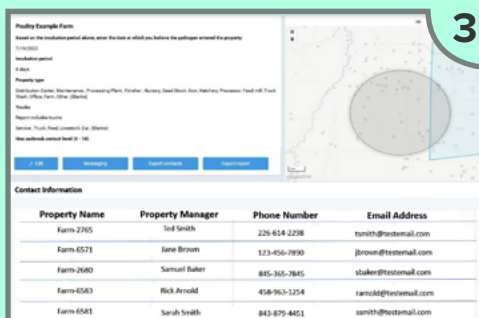

**1** Create disease control zones of any size or shape.

Green dots indicate farm locations.

**2** Anonymize farm location data so that the maps can be shared.

**3** Generate a list of all farms in the control zone including contact information.

**4** Send notifications to farms and stakeholders.

## FARM HEALTH FASTMAPS FEATURES

### MAP CONTROL ZONES IN MINUTES

Quickly and easily create control zones of any size

### IDENTIFY ALL FARMS IN A ZONE

Generate a report listing all commercial and backyard farms in the control zone, including contact information

### SEND DISEASE RISK ALERTS

Send messages to everyone in the control zone notify them of heightened disease risk in their area

### BETTER PREDICT DISEASE SPREAD

Factor in weather conditions such as wind speed and direction, temperature and humidity to better predict and prevent disease spread

### COMBINE MULTIPLE SECTORS

Merge multiple livestock sector data together if an outbreak impacts more than one species

### REROUTE TRANSPORTATION

Send alerts to service providers and other industry partners about delivery routes to avoid in the control zone to prevent disease spread outside of the zone

Speed matters when disease is suspected. Taking rapid action to identify control zones, improve communication and enhance biosecurity measures will mitigate the impact and spread of disease.
